

Since their foundation in 2015, Cevotec evolved to the leading developer and provider of patch-based manufacturing technology for fiber composites. With the production system SAMBA and the CAD-CAM software ARTIST STUDIO, we offer one of most advanced manufacturing systems worldwide, and we will further extend our portfolio of process and software technologies in the future. It's our own software development in particular that enables us to implement complex processes while keeping the design process easy and efficient for the user.

We follow a big vision: We want to revolutionize the composites industry and establish Fiber Patch Placement as a new global standard. Let us jointly set milestones in future lightweight strategies - **milestones in composites**.

Starting in January 2019, we are looking for a

Automation & Control System Developer (f/m)

Your responsibilities

- Design control architecture for our production systems
- Programming of machine and plant controls using commercial software components as well as new development of software modules
- Systems engineering for the integrated system
- Technical and commercial project responsibility
- Compliance with programming standards and documentation

Your qualifications

- Successfully completed university degree in mechanical/electrical/electronic engineering, mechatronics, computer science or similar
- Minimum two years of experience in the development of control concepts including drive technology
- Experience in PLC programming of machine and plant controls
- Experience in handling control hardware as well as the commissioning of control components and bus systems
- Nice to have: Machine vision skills
- Team spirit and very good communication in English

Your chances

- Tasks in diverse and state-of-the-art fields of automation technology
- Personal and professional development through trainings, workshops, visiting fairs and regular feedback meetings
- Flat structures and short decision paths
- An attractive remuneration package and other benefits (snacks and drinks inclusive)

We are passionately building a leading high-tech start-up and expect the same engagement from you. If you want to be part of our experienced and highly motivated team, convince us with your application.

Please send your application, along with your earliest entry date and salary expectations to **Sara Lax** (HR Business Partner), career@cevotec.com. Questions upfront? Call us at +49 89 2314 165-55.

do your thing. do it cevo.
